

HOW  
IT

## WORKS

Venus Versa™ uses NanoFractional Radio Frequency (RF) and SmartScan™ technology to deliver energy through the skin's surface, which stimulates fibroblasts and rebuilds collagen. After a short healing period, skin damage and the appearance of textural irregularities in the skin are reduced.

Dull pins on skin's surface deliver targeted energy to deeper skin layers by creating very small, micro-dermal wounds.

The surrounding healthy tissue helps to heal these micro-wounds, which improves skin texture with minimal downtime.

VENUS VERSA

## SKIN RESURFACING

Reduce signs of skin damage and improve the appearance of uneven skin texture, no matter how fair or dark your skin tone. With just a couple of quick sessions, you'll notice a naturally smoother, more radiant, and healthier-looking complexion that lasts.

WHAT  
TO

### EXPECT

A typical treatment plan consists of 3-4 sessions total, with 1 treatment every 4-6 weeks. Treatment plans vary by individual.

SHORT  
AND

### RAPID RECOVERY

You will experience redness post-treatment. You can resume wearing sun protection and makeup 24 hours after treatment.

SEE  
THE

### VISIBLE RESULTS

This technology is proven to effectively resurface the skin, resulting in a reduction in acne scars, minimizing enlarged pores, diminishing redness, and improving tone and texture of the skin.

SAFE  
FOR

### ALL SKIN TYPES

Venus Concept's skin resurfacing treatments use technology that is safe for all skin tones, even darker ones.
